

Company - Iot
Tracking, sensor monitoring,
telematics.

Iot sensor no
Iot asset tracking.

Build a better GPS asset
tracking.

Agriculture

Equipment tracking

Livestock tracking

Soil moisture

Tank level

Temperature monitoring

Software

Manage data remotely

Configure device settings

view server logs

Effective debugging

Multi connectors (many devices)

Device Integration (HTTP/HTTPS)

Data is secured

Web API is used to set parameters and (connector) enabling device control.

OEM server admin interface.

Device management service.

Choice of software system

(telematics curcu)

Firmware ~~management~~

Device parameter ~~management~~

Health monitoring

Manufacturer level debugging

Manage tank levels

weather station

Water management and netting

Remote pump management

Soil moisture

Pulse Counting

Trailer tracking

Real time location system

Location engine

Find location using
cloud processing.

reqd.

logistics tracking

(cargo, trucks etc.

Health care equipment

Driver behavior in oil and
mining

Pallet tracking

Supply chain

check & force on cargo

check tampering on door

track tools

Track waste management

Second Table

Lot devices
